

# PRODEA Investments is managing a complex real estate portfolio with SAP on Azure

## Prodea Investments accelerates in record time its digital real estate business by migrating SAP on Microsoft Azure

Prodea Investments is the leading real estate investment company in Greece, listed on the Athens Stock Exchange (ATHEX). With total assets exceeding €2,4bn, Prodea engages in real estate investments and is internally managed by experienced professionals with proven sourcing, execution and value creation track record.

Prodea Investments operates on SAP ERP platform and SAP Real Estate Management application supporting successfully end to end its business in a local and international level.

After researching different options and by focusing mainly on a high-quality and stable solution aiming to offer reliability, scalability and performance, Prodea Investments decided to move and migrate its SAP ERP systems to the Microsoft Azure cloud platform with Real Consulting.

Real Consulting provided the required SAP landscapes on Azure with the complementary set of technical implementation services for Azure and SAP Systems.

*"To address digital trends, real estate challenges and expanding technological needs, it was necessary to create a new platform for our SAP applications that would be ready in a short time period to support the growing demands of our business"*

Digital Officer

### COMPANY PROFILE

**Customer:** PRODEA INVESTMENTS

**Location:** Athens, Greece

**Website:** <http://www.prodea.gr>

**Number of Properties:** +370

**Industry:** Real Estate

**Products and Services:** Microsoft Azure

### PROJECT OVERVIEW

**Services Performed:** On-premises SAP ERP 6.0 with Real Estate Management Application migration to Microsoft Azure

**Project Duration:** 3 weeks

**Go-Live:** January 2020

**Benefits:** Optimized infrastructure, increased performance and scalability, reduction of IT running costs.

With a substantial number of properties in different locations, the efficient management of a complex corporate real estate portfolio requires simply connected IT solutions.

The digital revolution is challenging corporate real estate teams to become more agile. IT infrastructures need to deliver the right amount of IT resources in terms of computing power, storage and bandwidth giving the ability to Real Estate companies to scale elastically in the future as the increase of business portfolio demands. Prodea Investments wanted to move from its legacy SAP infrastructure to a new environment and prepare for the deployment of new business applications. In addition to that, Prodea wanted the new SAP platform to be implemented fast, to consume less internal IT resources and be scalable according to future business needs.

*“Our goal from the beginning was to quickly deploy infrastructure and services to meet all our business needs. The migration and transition of our SAP systems to Microsoft Azure with Real Consulting was the right decision and in the right direction to support our expedited digital transformation strategy”*

**Michael Vartholomaïos**  
Digital Officer

By migrating its business applications and systems on Azure, Prodea Investments has a totally flexible Azure infrastructure with servers certified by SAP and platform services that enable continuous monitoring for operating systems and SAP solutions. At the same time Microsoft Azure offers the opportunity for fast deployment on the cloud of any additional SAP application and module required by Prodea in the near future.

Real Consulting offered Prodea Investments its help to move SAP Development, Quality and Production systems through migration to Azure with higher performance and resource capacity, lower TCO and enhanced framework of managed and support services.

## Why Real Consulting ?

By having more than 19 years of SAP experience in business transformation across numerous industries and by following both SAP and Microsoft best practices, our high skilled and certified consultants for SAP installations, upgrades, migrations and project management can ensure the optimum and successful transition of your SAP on-premises installation to Microsoft Azure.
